

INCLEMENT WEATHER

During winter, the District notifies local TV and Radio stations regarding school closures or delays. The National Weather Service will be used to determine local temperatures. A link can be found on the district's website. Additionally the district's Facebook page will provide regular updates on the status of school closures.

The Superintendent and the Transportation Director will be on the roads early in the morning to evaluate road conditions and also take into account current and immediate weather forecasts. The Superintendent and the Chairman of the School Board make the final call – in most cases by 5:45 am. During severe cold weather, if the temperature at 5:45 a.m. falls to -20°F (ambient or wind chill) or lower, school will be canceled for the day.

The District realizes not everyone will agree with all closures, but our staff makes every effort to come to the best decision possible. Student and staff safety is of paramount importance. Please note that if emergencies or severe weather occurs during the school day that result in school closures, the parents will be notified via the district's student information system as well as local TV, radio stations and Facebook

During the school day, if the temperature falls to 10° (ambient or wind chill), students will not be expected to go outside for recess.
